Professional Summary

Backend-focused Full Stack Developer with 2+ years of experience designing and building scalable web applications using Laravel, MySQL, and REST APIs. Strong experience in backend architecture, database optimization, and real-time data processing. Proven ability to deliver production-ready systems in fast-paced startup environments. Actively seeking backend or full stack engineering roles in product-driven teams.

Technical Skills

Backend Development: Laravel, PHP, REST APIs, MVC Architecture

Databases: MySQL, Query Optimization, Indexing, Joins

Frontend: React.js, Redux, HTML, CSS, JavaScript

Programming: PHP, Python, JavaScript

Tools: Git, GitHub, Postman, VS Code, phpMyAdmin

Foundational Knowledge: Data Analysis, Backend Architecture, Real-Time Systems

Learning (In Progress): PostgreSQL, Generative AI (LLMs, Prompt Engineering, LangChain, Python)

Experience

Dec 2024 – **Software Engineer**, FinScanner AI Solutions, Ahmedabad, Gujarat

- Mar 2025
 - Architected backend modules using Laravel for processing large-scale financial datasets.
 - Built real-time data processing pipelines to handle high-frequency inputs.
 - Designed and deployed REST APIs supporting analytics dashboards.
 - Ensured application performance and reliability under increasing data loads.

Jul 2024 – **Software Engineer**, InstaMed, Mumbai, Maharashtra

- Nov 2024
 - Worked on backend development using Laravel to support healthcare-focused web applications.
 - Optimized database queries using caching and indexing techniques.
 - Integrated backend APIs with frontend systems and third-party services.
 - Collaborated with cross-functional teams to deliver features within tight timelines.

Oct 2022 – **Full Stack Developer**, Vertex Technosys, Solapur, Maharashtra

- Jul 2024
 - Developed and maintained full-scale backend systems using Laravel following MVC architecture.
 - Designed and implemented RESTful APIs consumed by React-based frontend applications.
 - Optimized MySQL queries using indexing and query restructuring, improving response times.
 - Implemented authentication, authorization, and role-based access control.
 - Improved frontend performance through lazy loading and efficient state management using Redux.

Education

Aug 2018 – **Bachelor of Technology (B.Tech) in Electronics and Telecommunications**

Aug 2022 **Engineering**, N. B. Navale Sinhgad College of Engineering, Solapur, Maharashtra, CGPA: 8.37

CERTIFICATIONS & TRAINING

- Accenture Digital Skills: Artificial Intelligence
- Python for Data Science
- Google Fundamentals of Digital Marketing
- SoloLearn: C, Python, SQL
